

Living Water Campaign

Over 1,000 cases received so far...and still counting!!!

Living Water Campaign was launched by the Help Haiti Heal Project after the devastating January 12th earthquake hit Haiti leaving many people without food and potable water. Our first contribution to the continuing rebuilding effort is to collect 10,000 cases of water to be shipped to the orphanages in Haiti. So far we've collected over 1,000 and are still counting. We are looking to target 10 orphanages in need of water so that we can stock them with at least 100 cases each with this first shipment. The goal is 10,000 cases and as you can see, we are well on our way! We want the initial shipment to focus on and reach the orphanages and then the subsequent shipments to reach other areas in need as we begin to hear about them. But that's what we will need, TO HEAR ABOUT THEM.

And that's why we need you.

HELPING HAITI HEAL... OUR IMMEDIATE GOALS

- **Identify 10 orphanages in Haiti to deliver at least 100 cases of water to.**
- **Funding to ship the cases of water to Haiti with a team of 5 people to make sure it is delivered to the orphanages in need.**
- **Set up drop off locations in the tri-state area and around the country to help us reach the targeted goal of 10,000 cases.**
